

End the Injustice!

In times of crisis, the neoliberal system shows its weaknesses even clearer: the economy cripples and many people lose their jobs. Those who were already neglected and left in despair during the "economic boom" are now even worse off.

Then, after the crisis is over, the wealthy get wealthy again and the poor stay poor or get poorer. Those who own a family business were hit harder than those in the big companies whose greed may even have been the cause of the crisis.

All the while the rich and corrupt maintain their privileged positions, the rest of the people have to bear the burden. Which burden?

They bear the burden of unemployment; the burden of social injustice; and the burden of the reawakened greed of the elite in the economy and politics. Both which work together to further exploit the broken system. These few elitists do not learn and do not care about the people in their country.

They are only motivated by money and power!

No More!

This system of systematic injustice must end!

Employees shan't be mere tools which can be carelessly thrown away!

Small business owner shan't be the victims of the gamblers high up in the economic system!

Therefore, I demand:

- ❖ *Put all cost on ice which are not self-inflicted (e.g. A crisis due to a virus → Covid-19) and the assistance and support of workers during and after the crisis*
- ❖ *A just distribution of the tax burden to adequately fund and maintain essential structures to society (e.g. schools)*
- ❖ *Long-term elimination of poverty within 10 years*

Only a society in which everyone is able to grow can truly flourish!

- Signed, JW
